

# SOLMATIC

design manufacturing startup

INTEGRATED MANUFACTURING  
SOLUTIONS FOR AEROSOL PRODUCERS  
AND PACKAGING FACILITIES

# PEACE OF MIND. EIGHT DAYS A WEEK.

Reliable manufacturing is what you need. To ensure that you really get the peace of mind Solmatic comes with a comprehensive offer for aerosol and perfume fillers. The machines are only a part of the package, other elements include:

## Online Monitoring

Key manufacturing performance parameters are collected by the controller and are made available to you in an access easy format over the internet, so you can view them regardless of the location you are in. There are also a few presentation formats and alerts to choose from. On-line monitoring is also a tool to make sure the production goes smooth, and for a quick reaction to any issue that may arise.

## Installation and Staff Training

We understand how crucial a reliable and uninterrupted production is for your business. It is sometimes a challenge for an employee to learn how to operate a new equipment. Not with us - we visit your site prior the designing process and then we install everything at your facility. We provide full training for your staff and support until production is under way. To ensure smooth production we offer fitting and commissioning service with each delivery. Our operating systems become intuitive and easy to work with with the full pre-manufacturing trainings for your employees. All these to make sure that when your manufacturing line arrives you have its full capacity under your fingerprints.

## Extended Warranty Options

Solmatic offers wide range of warranty options which are customized to suit your individual needs, combined with simple pricing terms, provide confidence toward your manufacturing system's performance. You have the option to choose the warranty length, warranty and post warranty service, as well as any upgrades that may occur during the course of the contract.

## Upgrades & Refurbishments

Market requires continuous adjustments to customer needs. Manufacturing machines have to be upgraded quite often in response to developing product, quality or safety. In response to those needs Solmatic offers services that keep your manufacturing equipment continuously up to the current standards and your vision. We also refurbish old machines of various producers to restore their full functionality. Our experts assess their condition and present you with tailored refurbishment offer. We can perform one time task or you can contact us and we will prepare an individual service package for timely revisions, so you never have to worry about your machinery condition and just focus on growing your business.

## Easy Change of Format

The variety of products grows everlastingly. To be flexible and able to produce larger, smaller, thicker, thinner, higher, shorter .... formats we made it easy to adjust the line and to change it. Both disassembling and assembling have been simplified to the shortest possible degree. All sets are distinctively marked to avoid any mistakes when speeding with the change.

## Spare Parts

Solmatic is very sensitive to customer need for spare parts, therefore we keep spare parts for our machines that may need replacement in stock. Our reaction time to customer need is very competitive. We can ship spares by courier, train or plane - whatever is most convenient for you. We also have spare parts distributor in Moscow for quicker access. We know that any system is only as good as its weakest link. This is why our machines are always delivered with a set of spare parts necessary for production during standard warranty period, so you can benefit from your system's full potential - at all times.

# ANSWER TO ANY MANUFACTURING CHALLENGE YOU FACE.
